

Warnes Associates *structures* is a dedicated, specialist civil and structural engineering consultant.

Main office infrastructure is centered within Warnes Associates Bangkok Office, with a large team of engineers and specialists for drainage, road, geotechnical, and structural disciplines, along with technical support staff. Satellite offices in Phuket and Koh Samui, along with dedicated Bangkok staff, support the projects during construction implementation stages.

Established in 1999, Warnes Associates has grown in stature to become one of Thailand's leading structural engineering practices, having completed commissions for high rise apartments and offices, industrial complexes, commercial facilities, resorts and spas, specialist facades and sculptural structures, residential estates including infrastructure works, as well as individual high-end residences from modest sizes up to estates of 9,600 square meter built-up area.

Warnes Associates

Phuket Projects

- BANGKOK
- PHUKET
- SAMUI

Warnes Associates provides professional engineering design for civil and structural disciplines, and has been involved in numerous projects of significance on the Southern Thailand resort province of Phuket.

From the initial work in preparation of construction design documentation for Baan Chai Naam in 1999 and in following years, work at Surin Springs, Samsara, and the Dulwich Primary School projects, thence establishing a local office in Phuket in 2002. Warnes Associates has now completed or is undertaking commissions as part of the design team for many of Phukets most prestigious projects.

Warnes Associates has undertaken project work beyond civil infrastructure and structural design of high-end residential projects - with Hospitality & Resorts (Mangosteen Spa and Resort), Educational (British International School, previously Dulwich Primary School), and Industrial projects (Thaisarco), all featuring within Warnes Associates portfolio.
